PROJECTS

Farm Workers Due Maintenance App Python, Flask, SQLite, JavaScript

- Built and deployed a multi-user full-stack web app (Flask, SQLite, Jinja2, vanilla JavaScript) with 25+ routes to manage workers, work batches, wages, and pending dues.
- Implemented session-based login and per-user data isolation; designed a 4-table relational schema with foreign keys and cascade deletes.
- Wrote SQL joins and aggregate queries for the dashboard, and logic that calculates earnings and dues per worker per batch, caps payments at the due amount, and recalculates totals after each payment.
- Built a responsive UI using Flexbox, Grid, and media queries; deployed on Render with gunicorn using Git and GitHub.
- Wrote a 42-page project report covering DFD, ER and UML diagrams, feasibility study, and test cases.
